

Stripe-lambda setup:

1. Install dependencies in stripe-lambda

`npm install`

2. Install serverless globally

`npm install -g serverless`

3. Setup serverless access key and secret key

`serverless config credentials --provider aws --key replace-access-key-here --secret`

`replace-secret-key-here`

To override

`serverless config credentials --provider aws --key replace-access-key-here --secret`

`replace-secret-key-here -o`

4. Deploy lambda

`serverless deploy`
